

Safety Management Systems Manager (SMS) Virtual Workshop

Virtual Workshop Description

This Safety Management Systems Manager (SMS) Virtual Workshop is spread over 2 half days and is designed to familiarize the candidate to the various roles, responsibilities, and duties of a Safety Management Systems Manager.

Course content:

Day 1 – 4 hours

- Historical perspective on safety Management
- Explanation of the requirements and structure of an SMS program
- Discussion of the SMS business case and the financial implications of an SMS program
- Review of how to conduct a Gap Analysis and prepare a Coherence Matrix
- Review of the Safety Flow and how it guides the daily activities of the program
- Review of how to conduct safety investigations

Day 2 – 4 hours

- Explanation of the methodology used to complete effective corrective action plans
- Discussion on the inter connectivity of a SMS program and a Quality Assurance program
- Review of Occupational Safety and Health requirements in aviation and how they relate to the SMS program
- Discussion of safety promotion and different methods that can be used. The benefits and limitation of each method will be discussed
- Review of how to measure the effectiveness of the SMS program
- Review of SMS implementation issues and what an key elements an implementation workplan should have

****Participants also are encouraged to have prior safety officer experience before enrolling in the SMS Virtual Workshop**

[Register](#) for the Safety Management Systems Manager Virtual Workshop
